**Subject: Pre-qualification Application from Star City Pest Control & Cleaning Services – Pest Control and Cleaning Services**

Dear Sir,

We refer to your submission with Ashghal Reference: 2019/0052703/1 dated 07 November 2019 and your request for "Star City Pest Control & Cleaning Services" to be considered under Ashghal's Approved Vendors List for Pest Control and Cleaning Services.

You are kindly requested to note that Ashghal's Approved Vendors List currently has no approved category for the product applied for Pre-qualification. The applicant is referred to the online Approved Vendors List at <http://www.ashghal.gov.qa/en/Services/Pages/ApprovedMaterialHome.aspx>

which states the following:

*"Where there is no category for the Manufacturer; the contractor shall submit details of the materials in accordance with Qatar Construction Specifications (QCS), Section 1 Part 7 and the approval shall be granted by the supervising consultant of the project on project-by-project basis."*

Therefore, products not listed in any of the Approved Vendors List categories shall be required to make their submissions on a project-by-project specific basis until such time that a category is established.

The applicant's documents shall be made available for collection at the Vendor Management Unit within 14 days of the date of this letter after which time the documents shall be destroyed/recycled.

The Authority shall not be held liable for suppliers or manufacturer losses, expenses, damages to reputation or any other such damages which may be incurred by taking part in this pre-qualification procedure.

ستار سيتي للتنظيفات ومكافحة الحشرات  
STAR CITY PEST CONTROL & CLEANING

## INTRODUCTION

At the outset, we would like to introduce you STAR CITY PEST CONTROL AND CLEANING SERVICES WLL (SCPC)

It is professional owned company which has many years of experience of the pest control industry and due to the belief in quality and customer satisfaction. We regularly provide training and service procedure to our service team.

No problem is new to us. Because we have experience of local climate, we have experience in all types of conditions, problems and solution. With our proven procedures and products, we feel confident that we can overcome any problem and prevail as a continued leader in our pest control industry.

Our people make us better with continued training, the latest equipment, high standards. We are capable of offering the best pest Control service in the Region.

Three Zone services: SCPC is the only pest control company in the Region that has categorized its

### Services in three Zones

#### 1. Outside Zone

It covers outside areas of the building, such as lawn and garden.

#### 2. Entry Points of the Pest

It refers to all entry points of the building.

#### 3. Inside Zone

Inside facilities of the house and building such as kitchen, dining hall and bedroom etc.

## STAR CITY PEST MANAGEMENT

1. **PEST CONTROL** – Both the residential and commercial .this service covers the entire pest that may

be encountered inside of the structure. rats ,mice ,roaches ants, flies and others assorted pests

2. **Termite control**- we are equipped to prevent or eliminate the all termite infestation .our products and techniques have been perfected over the year and tested in all soils, construction and weather condition .it is proven to be effective while being kind to the environment.

3. **Wood Borers**- we treat for dry wood termites /wood borers in structures or the other wood product by using especially design machine for the treatment of wood.

4. **Pre –construction termite control**- the best time to prevent termite activity is when the home and building is being constructed when the soil and the wooden members in the frame works of a structure is treated, it protect the building for many years to come.

### Product Safeties

The chemicals, procedure and equipment's that SCPC's employs is the safest in the world .we are firm

believers in baits and dust.

### Pesticides are categorized in three ways

P.O. Box : 63665, Doha Qatar,

Email : starpest.qa@gmail.com  
www.starcity.qa

ستار سيتي للتنظيفات ومكافحة الحشرات  
STAR CITY PEST CONTROL & CLEANING

1. Caution
2. Warning
3. Danger

We only use labeled product as caution what this mean is that some of the product are actually safer and less poisonous than common table salt. Other products are only design to kill insects, not human or other mammals

Many solvents used in liquid chemicals are highly dangerous to human. For this reason. We do not spray liquid inside a structure. Only Chemicals which are approved by the Local Authorities and which are best in quality are only used to spray inside and outside the premises.

Not only has it been proven to be harmful, but it is also ineffective. Most liquids will only remain active

for a period of a few minutes to a few days. Our products are odorless, applied only in a crack and crevices and have a long residual effect. This long residual allows us to service less frequently than other companies. All pesticides are dangerous in untrained hands. For this reason, we believe in ongoing training

programs. We cover not only safe handling of products, but also any new technology that is discovered. Our technicians are fully trained before they are allowed to treat for pest. This insures quality service for our customers, and consistency in our procedure

SCPC(STAR CITY PEST MANAGEMENT SERVICES) - services features

Safety and security to lives and environment. No health hazard, odorless, hassle free and eco friendly,

extra and extra care of the kids and pets, say no to liquids chemical inside.

## Tips for Selecting a Pest Control Service:

### → How do we select a competent pest control service?

First of all, many of us as homeowners, renters and landlords can control household pests through a combination of preventive measures, including proper sanitation and good home maintenance practices. However, some pest infestations may be extensive, or a particular pest may be difficult to control, requiring the services of a pest control company.

You should select a pest control company the way you do any other service - **Look for Quality and Value.** Costs and competency are important. When selecting a pest control service, cost should not be the only factor that determines the company you pick. It is important to make sure the pest control company you choose is competent. If pesticides are misused, both health and property can be damaged. Before contracting with a pest control company, consider the following:

### → Take Your Time/Do Your Homework

When most people discover a pest problem, they want the problem eliminated immediately. However, most problems can wait a few days so you have time to select a competent, reasonably priced company. It is wise to obtain several estimates from prospective companies.

If the service person asks you to do certain things before, during or after the pesticide application, cooperate and follow instructions. For example:

- If the service person asks you to remove personal items from the floor, empty kitchen cabinets and remove pets, make sure you have done this before they arrive.
- Do not allow children or pets into treated areas until the pesticide spray has dried.
- Aquariums should be removed from the treatment site or covered with heavy plastic and the air pump turned off.
- Remove all other household pets from the treatment area.

If the service person suggests non-chemical methods of pest control in addition to the pesticides, be sure to follow the instructions.

**Good cooperation between you and the pest control company will help eliminate pests and reduce pesticide use.**

“WE DO WHAT WE COMMENT”

ستار سيتي للتنظيفات ومكافحة الحشرات

## Pest Control Services

Star City Pest Control & Cleaning welcomes all the customers looking for the best customer service in Qatar. We are very honored to be trusted by millions of customers in the country. The support and trust of our customers are the wheels that keep us moving forward in the right direction. We have been able to extend our services to almost all the parts of the country due to the trust, love and confidence they have given us. Our customers are the reason we are here today. We want acknowledge all the love and respect given by our customers and promise that we will be bringing more innovative services for our beloved customers. We have been able to help millions of people live in a healthy environment through our cleaning services and pest control services.

At Star City Pest Control and Cleaning we provide our customers with all kinds of pest control services. Pests are very harmful for us and if not controlled properly than can even put various kinds of dangers to our life. Hence it is very important to eliminate any kind of pests from the living environment for the safety of life and property. Some of our pest control services include Termite pest control, Fleas pest control, Cockroach pest control, Rat pest control, Bird pest control, Tick pest control and many more.

**FOOD AND BEVERAGE PEST CONTROL**

Food and beverage processing industries are the industries that are mostly hit badly by pest infestations. Hence in food and beverage industry pest control is one of the most important aspects of management. Food and safety standards of international standards always mention how a food and beverage processing industry should always be free from all [...]

**OFFICE PEST CONTROL**

Office is one of the most important part of businesses because it is the face of the company. Any drawbacks in the office can directly reflect on the type of business done by the company. There are various kinds of problems in maintaining healthy environment in offices and pest infestation is one of them. Pest [...]

**RESIDENTIAL PEST CONTROL**

Pest is a very common problem in the residential homes in Qatar. These pests have been living in our homes for a very long time and have learnt to adapt themselves according to the human way and hence it has become very hard to get rid of them. There are various types of pests infestation [...]

**HEALTH CARE PEST CONTROL**

Health care centers such as health posts, clinics, hospitals etc. are very sensitive areas and should be highly maintained. Pest infestation in such areas can have devastating results for the people involved in the premises. Hence hospitals also need to be a role model area for the people in terms of sanitation and healthy living [...]

## Termite Control

Termites are small bugs which are extremely dedicated towards their work. While dedication in work is a good thing it is a bad news for us because termites are engaged in working to damage out human properties specially wooden furniture which are valuable for us. They work in thousands of groups 24 hours a day without really taking a break. They work in a very synchronized way which makes their work more effective. They are always working in a team which results in great loss of property to us. Termite Control Qatar

## Termite infestation

Termite infestation can be really hard to detect at the initial phase because these little nasty bugs do not come out in open at broad day light. They stay hidden under the bed, carpets or in the dark corners of the room. It is due to this very reason sometimes it is already too late when a person finds out his home is infested by termites. Hence it is necessary to keep on checking wooden furniture for any sign of termite infestation before it is already too late.

Once a house is infested by termites it is extremely hard to get rid of termites because they are extremely adaptive creatures. They basically can stay hidden for a lot of days if required and they do not easily die of hunger or thirst. Once the house is infested by termites they start munching away our properties. Along with wooden products they also eat all kinds of products made with cellulose such as paper, clothes etc. Along with the loss of properties they also can cause a disease known as SBS. In this case people can suffer through various symptoms such as asthma, head ache and rashes in the skin.

Star City Pest Control & Cleaning supplies professional exterminator for the termite control solutions. All of our services are provided by the people who are highly experienced and trained. We help you protect your properties and health from these harmful bugs with the most cost-effective solutions in Qatar. Along with eliminating the insects we also educate our clients of avoiding termite infestation in the future.

## Bed Bug Control

In any case if your home is infested by bed bugs then all you can think is getting them away as soon as possible. But bed bugs are extremely resilient parasites and once they invade a premise they are really hard to get rid of them. The most annoying thing about bed bug is they generally hide out in corners of the place where people tend to sleep such as sofas, beds etc. They also tend to attack its target during the night time at the time of

Resting and relaxing. Bed bugs infestation causes skin rashes and sleep deprivation in people which can lead people to frustration.

There are various signs of bed bug infestation in your property. The most important thing to look for is there are various rash marks on the skin when a person gets up. Once the problem is identified one can take certain steps to reduce the bed bug infestation but it is still very hard to get rid of it completely without any professional help.

The first thing to look forward to is the hygiene of your properties. Bed bugs flourish in dirty places as they are the perfect breeding ground for them. Spray products to kill off bed bugs can also be used to a certain extend but using too much pesticides can be counter-productive to the user.

Our company provides our customers with the most cost-effective solutions for bed bug for all kinds of properties. Our employees are highly trained with good knowledge of hygiene and safety standards.

## Cockroach pest control

Cockroaches are generally brown colored insects which can create a sense of disgust upon its first sight. They are found inside human premises many times as they have adapted themselves to live among humans. Food is contaminated by cockroaches when they crawl into food items. They generally live in dirty places, garbage areas, bathroom sinks, and toilet sinks etc. and hence carry loads of diseases in their bodies. Hence they are also a major carrier of diseases in humans. They also destroy items like clothes and paper. They carry kind of

stinky odors wherever they go and these odors remain for a long time.

Cockroaches are also known to create phobias in many people along with allergies. Due to these various reasons it is very important to get rid of the cockroaches. There are various home remedies that can be done prior to taking professional helps.

Cleaning of premises of a house is one sure way to reduce the infestation of cockroaches. Identifying the hideout of these insects and destroying them also helps. Using of insecticide for cockroach elimination is also getting quite popular.

After taking these prior steps, if the cockroach infestation does not decrease than you sure can call for professional help. Star City Pest Control & Cleaning supplies you with the most effective way of getting rid of cockroaches from your premises. We are so precise in our work that no cockroaches will be left in your home by the time our workers return after the service.

Our services are available for residential homes, shopping malls, restaurants, hotels, hospitals, offices, industrial warehouses and many more. All our services are available in the major cities of Qatar such as Doha, Al Rayyan, AL KHOR, Al WAKRA Etc.

## Ant pest control

Ants are hardworking insects and are one of the important parts of an ecosystem. But sometimes they invade our homes which can really have many bad impacts in our daily life. When your home is infested by ants, be prepared for their invasion in the kitchen where the food is kept. They come in large groups and attack various kinds of food kept in a place. Sugar, rice, bread, meat you name any they attack every kind of food. That is because ants eat almost every kind of food that we humans eat. Although ants do not

attack human if undisturbed but it is more likely for you to trip on some groups of ants. The ants will attack with their bite which is pretty nasty. Most bites of the ants are non-poisonous but they really create sensation of skin burn and discomfort. If the species of the ant goes out to be fire ant than you get prepared for more pain because as the name suggest their bites are really painful. Apart from this they also can create food poisoning. They can get into any kind of food and transmit the germs they are carrying in their body. Hence ant infestation is not good for your health either. Another prospect of ant infestation is they also can hamper the reputation of businesses. Presence of ants in hospitality sector is really dangerous for hospitality sectors. Customers tend to get disgusted with the presence of ants around them and ants somehow succeed to get into the food to be served to the customers. This can really hit the business very badly hence it is very necessary to get rid of the ant infestation on time.

**All our ant control services are available in all of Qatar. Our services include the following:  
Residential ant control Hospitality ant control Office ant control School ant control Hospital ant control**

## Rats Control

Rats and mice belong to the rodent family and many rats and mice have learnt to live in the environment where the human live. Rats have been living alongside human for thousands of years. Rats can be very dangerous for the property and health of human. Once a house is infested with rats it can be very hard to get rid of them because these rodents are persistent in their character.

Many people have phobias surrounding rats and mice and hence these rats can create a situation of panic just with their presence. The thought of rats moving around us can be nerve wrecking for many of us. They have been responsible for creating various kinds of allergies in people. The urine of a rat contains chemical compounds that contribute in triggering allergies in people. The droppings of mouse also cause allergies in people. This is particularly dangerous for the people who are suffering from asthma.

Some of the diseases caused by mice and rats are Listeria, Rat-bite fever, Hantavirus salmonellosis. One of the great destruction caused by the rats was in the 14th century. 14th century Europe saw a major outbreak of bubonic plague or black death which was responsible for wiping out the population of 30 to 40 percent in Europe. Such was the destruction caused by the bubonic plague that it is remembered as one of the most dangerous disease outbreak in the history of the human race.

Mice and rats are also responsible in transferring other parasites in homes such as fleas. The fleas live on the body of these rodents and get transferred in pets and human on getting opportunity. Fleas can really affect the health of our pets. Hence presence of mice and rats create other pest infestation as well.

Apart from health issues mice and rats can damage to the properties of our home. They almost eat everything which we as a human eat. Even when they are not eating they are constantly nibbling around to sharpen their constantly growing teeth. Wires, clothes, papers, mats, wooden items and almost anything become the victims of the rats and mice nibbling. The constant nibbling of electrical wires by rats and mice causes fire breakout in thousands of houses every year.

## Bird control

Pest birds have been quite a headache for many business premises. They cause various kinds of problems to the business owners as well as home owners. Bird control has become very important because they can create various kinds of health issues to human beings. They excrete feces and droppings which can cause significant damages to the property.

### Effects on business

Imagine what will happen if a shopping mall is infested by birds. People coming to shop around the shopping mall will park their cars or other automobiles around the shopping malls. The birds droppings and feces will drop on the cars or other automobiles. No one will definitely like that and hence they will avoid the place which can result drops in the business of the place. Also their droppings and feces may land on customer's head or clothes. This will certainly create uncomfortable scenarios. Hence removing birds from a property becomes necessary for the protection of business. Bird Control Qatar

Birds also tend to eat away food of human beings and create damage to the property. They also can cause damages to the electrical wires and equipments. Their constant chirping sounds may be annoying for many people.

Bird control is the process of eliminating birds from a property. Star City Pest Control & Cleaning is known to be the best bird control service provider in Qatar. We use various deterrents such as physical deterrents, chemical deterrents, visual deterrents etc. to remove bird infestation from a place. We try to use methods that are the least harmful for birds and environment because we understand that birds are one of the vital parts of our ecosystem.

We are proud to serve customers of various kinds. Our services are available in major cities of Qatar such as Dukhan, Doha, Al Rayyan, Al Khor and many more.

## FLEAS

Fleas are parasitic insects that are mostly found in the body of pets such as cats, dogs etc. These insects generally feed on blood of your pets for survival. These fleas reach out to human via pets of human. Generally fleas are transferred in your pets when these pets play or come in contact with other animals that are already infested by these harmful insects. Although most common types of flea do not bite human but some certainly do. These fleas can transfer to the human when cats or dogs play or sleep in the bed of humans.

It is estimated that there are more than two thousand species of fleas in the world. Various kinds of fleas depend on various kinds of hosts for survival but only few types of fleas are parasitic to human and human pets (cats and dogs). These fleas do not have wings but are a very good jumper and hence even without wings they can jump so much that they can easily jump from one animal to another when in close range.

Fleas are the bitter truth of life for every pet owner. These fleas not only suck blood from the body but create unimaginable amount of irritations in their skin. They can create various kinds of skin complications for the pets. Some fleas can even create internal complications. Many pets suffer through anemia due to the blood sucking of fleas. They also can cause tapeworms in the bodies of pets. As we all know how dangerous tapeworms can be as severe case of tapeworm can create extreme weight loss and even death.

Fleas are not only dangerous to pets but are equally dangerous to humans too. They have been known to cause plague and cat scratch fever in humans. Hence it is very necessary to get rid of the fleas as soon as possible.

City Star pest control provides fleas control services for all kinds of pets. Our fleas control services are focused on getting rid of the fleas from your pets without having any side effects on the pets. Our highly experienced staff will follow all the standard procedures such as testing for the kinds of fleas and getting rid of it in the most effective manner. Hire our flea control services to gift your beloved pets a healthy life as we know pets are a part of our family.

## MOSQUITO

Mosquito is one of the most dangerous insects that are responsible for thousands of people in various countries. Female mosquitoes suck the blood from animals and in doing so they tend to spread various diseases such as yellow fever, malaria, filaria, meningitis etc. Other general problems created by mosquito infestations are sleep deprivation and skin rashes.

Using mosquito net and mosquito repellent is one of the best way to prevent mosquito bite but both may not be possible all the time. Hence instead of preventing mosquito bite it is better to eliminate mosquitoes from the house and its surrounding. Getting rid of mosquito once being infested is certainly not an easy task because it requires enactment not only from an individual but from a community as a whole. If the problem of mosquito persists then it is better to take professional help. Mosquito control Qatar

Star City pest control provides professional help, guidance and advice to get rid of the mosquito problems. Our company provides fast home delivery service with the most effective techniques to ensure your safety. While eliminating mosquitoes from your property we also try to cause minimum environmental damage. We use more environment friendly materials and equipment to get rid of the mosquitoes.

What do we provide?

Larvicidal treatment

Fogging treatment

Professional advice and knowledge to avoid mosquito infestation

The larvicidal treatment used by our company will attack the larva of the mosquito and eliminate them before they mature. This results significant reduction in the number of mosquitoes. The fogging treatment will give you instant relief from mosquito infestation. The technologies we use are very eco-friendly and will not contaminate the water bodies in the surroundings.

✦ **Keeping Pests out of Your Home**

## GENERAL INFORMATION

What does an uncontrolled pest problem in your business mean to you?

- ✦ **Health problems.** Diseases such as salmonella, dysentery, diarrhea and stomach upsets are ailments which can be transmitted by pests.
- ✦ **Workplace disruption.** As a result of the health problems that pests can cause, your workplace can be affected by lost work time, reduction in productivity, and a discontented workforce.
- ✦ **Dissatisfied customers.** If a pest problem persists, your good public image may be at risk and there's nothing worse than a bad reputation.
- ✦ **Regulatory compliance problems.** Depending on the nature of your business, there may be government regulation to require a pest-free environment for your business to keep operating. Failure to comply could lead to business closure.

## RANGE OF SERVICES OFFERED

We service all types of structures:

### **Residential** - Homes and apartment buildings

Residential Services are normally standardized since most homes have common problem areas. For this reason, it is often possible to get an approximate cost for a service over the phone. However, we are only too happy to customize a management program to suit any residential property based on your budget and the results that you want to achieve.

### **Commercial** - Drugstores and drugstore chains, office buildings, and hotels

Commercial Services always require a customized approach and require a site visit to ensure that a cost-effective management solution can be quoted. Depending on the pest, commercial services often come with a regular maintenance arrangement to ensure that your premises stays pest free. Our aim is to ensure that you get the results that you want in the most cost effective manner.

**Food storage, processing and service facilities:** Processing plants and warehouses, Restaurants, bars, and fast food chains, Supermarkets and grocery stores.

**Industrial** - non-food storage buildings and factories

**Medical** - Hospitals and nursing homes

**Schools** and other educational institutions

**Ships** and Other Vessels

**Termite Control** (pre-construction and post construction)

## OUR TECHNICIANS

Our Technicians are trained to assist you in solving your pest management problems. Their focus is to provide management options that will be effective and ensure the safety of you, your property and the environment.

## PERSONAL PROTECTIVE EQUIPMENTS

**Overalls** - Long sleeves, no turn-ups, with collar, loose cut, no patch pockets, pockets with protective flaps.

**Hat** - With protective brim and full crown.

**Safety Boots** - Steel toecap, leather, non-slip sole, and ankle bootlace up style. Worn with socks.

**Gum Boots** - For use in wet conditions to protect against contact with rodent, urine and various pathogens. Worn with socks.

**Rubber / PVC Gloves** - Gauntlet style, no fabric cuff or liner.

**Face Shield** - With replaceable face plate, brow guard and adjustable strap.

**Respirator** - Either disposable non-woven fiber type or rubber face piece with appropriate cartridge filter. Respirators must meet the standard of protection required for protection against toxic agents in use.

**Hearing Protection** - Ear defenders or disposable ear plugs. All Products used are laboratory and Field tested for efficiency and Safety.

## TERMITE SERVICES

### About Termites

Insects that superficially resemble ants in size, general appearance, and habit of living in colonies; hence, they are frequently called “white ants” that lives in warm countries. Subterranean termites establish themselves in buildings not by being carried in with lumber, but by entering from ground nests after the building has been constructed. If unmolested, they eat out the woodwork, leaving a shell of sound wood to conceal their activities, and damage may proceed so far as to cause collapse of parts of a structure before discovery. There are about 2700 species of termites; but the two major ones, classified by the manner in which they attack wood, are ground inhabiting or subterranean termites (the most common) and dry wood termites, have been on this earth for more than 250 million years, long before humans.

### Signs of Termite Infestation

Termites cause more damage than all fires, storms, tornados, earthquakes and hurricanes combined! That’s millions in damage every year. Yet it is the most preventable of all of those disasters. In UAE municipality makes it compulsory to termite treatment for all new construction, because they fear that your home or business may be on the termite hit list, and unless you protect yourself, it will be only a matter of time before they strike!

Live termites in or around windows and doorframes. Swarmers inside the house nearly always indicate an active infestation in the structure. (The presence of swarmers outdoors in a natural phenomenon, but should warn that termites are near and possibly attacking a nearby building).

## How Termites Enter the Home

Termite damage does not come solely from dining habits; structures are also damaged by tunneling and nesting activities. The most common termite, the Subterranean Termite, builds its colony up to 18 - 20 feet below the ground surface to protect it from extreme weather.

These termites construct underground tunnels or above-ground shelter tubes of mud which are used to explore for food and connect their underground colony to that food source. Through such tubes, termites are able to enter a building without direct wood contact with the soil. Termites create mud tubes to protect themselves from dry air as they travel from their underground colony into the building. The tunnels tend to follow the wood grain.

Once inside, termites can infest virtually any part of your building including wood trim, wallboard, siding, even picture frames. As soon as termites discover a food source, they leave an invisible chemical trail to attract other termites and for others to follow.

Termites can also enter buildings through cracks, expansion joints, hollow bricks or concrete block as around the plumbing. They can find their way into a structure though an opening as small as 1/64 of an inch. Any building, whether constructed with slab, basement or crawl space foundations, can be a target for termite infestation. Even buildings with steel framing and masonry walls are targets because of the wood door and window frames, wooden support beams (often hidden), cabinets, or shelving within them.

termite activity.

Prevention is the best course of action when it comes to termites and your home **SCPC** can provide annual inspections to make sure your home does not fall victim to untreated

If you are considering listing your home or building for sale, be sure to have **SCPC** inspect the property prior to bringing it to market to avoid problems later.

### Elimination of the termites

The safety of people, pets, and the environment is **SCPC**'s commitment. For this reason **SCPC** professionals will thoroughly inspect, accurately identify and fully explain the nature and extent of your pest problem. The choice of corrective measures and control options will then be based on your specific site and situation.

**SCPC** can control all termite species with a variety of proven procedures and treatments, both for preventing infestation and eliminating them. Preventive anti-termite treatment is essential for any premise - whether it is an existing structure, or under construction or renovation. **SCPC**'s uses the chemical-barrier method that includes slab injection (post construction) and surface spray (pre-construction). Liquid termiticides are usually applied completely around and underneath a structure covering all areas where termites might gain access. For new construction, this is accomplished by treating the graded soil before the slab is poured. For an existing building, the perimeter of the foundation is trenched and drilled then treated with termiticide. The goal of the treatment is to put a chemical barrier between the termites in the soil and the structure above. The chemical barrier can also affect those termites inside a building by preventing their return to the soil. In many cases these termites will die of dehydration.

**SCPC** technicians are trained and certified specialists who understand termite biology and behavior, and are dedicated to doing the job right.

### SPRAYING EQUIPMENT

- ⊕ A pressure pump shall be used to carry out spraying operations to facilitate proper penetration Of chemicals into the earth with well-trained Pest Control Operators.
- ⊕ The treated areas should be covered by polythene sheets to protect against ultra violet rays of the sun. It takes 2-3 hours for the chemical to bind with the soil and the treated areas should be kept undisturbed during the said duration before commencing the concrete work.
- ⊕ The application of the termiticide will be at a ratio of 1:199 that is 1 liter of chemical to 199 liters of water. The sub-contractor will strictly adhere to the manufacturer's guideline and instructions while carrying out the termite operations.

**STAR CITY**  
PEST CONTROL & CLEANING

## STAR CITY PEST CONTROL is a young company with BIG ambitions

### OUR MISSION

'STAR CITY PEST CONTROL it is our mission to provide the highest quality service of unmatched value to our clients through the efforts of a highly dedicated, trained and productive work force who share a commitment to long term growth and success of the company'.

### OUR VISION

To be a company of caring professional people, delivering only the best class of service.

### OUR PEOPLE

With big ambitions, how do we achieve this? By making sure we have the right people for the right job and the right attitude to getting it done. So when we say that STP is a caring company delivering only the best class of service, we really mean it!

## PROTECT YOUR HOME / BUSINESS FROM TERMITES

### BORATE TERMITE WOOD TREATMENT

Protect new homes from infestation with wood termite treatment, an effective termite control solution. HomeTeam Pest Defense's borate wood treatment acts as both a termiticide and a termite repellent for years after application.

The best way to protect the wooden structure of a new home from subterranean invaders is to make the wood so distasteful they'll head elsewhere. Highly effective borate wood pretreatment from HomeTeam does exactly that, penetrating deep inside the lumber framework to provide long-lasting protection.

### TERMITE SOIL TREATMENT

Protect new homes with termite control soil treatment. HomeTeam Pest Defense's two-step liquid treatment is effective and provides long-lasting protection.

Termites present a significant and constant threat to the value of any home. That's why we apply a soil pretreatment to eliminate problems before they happen. By applying virtual barrier to the soil during new construction, our home termite control prevention sends unwanted guests packing.

### SENTRICON® SYSTEM FOR NEW CONSTRUCTION

For around the clock termite control for existing homes and new construction HomeTeam uses Sentricon® Colony Elimination System with Always Active® Technology. Protect your home from subterranean termites with professional Home Team monitoring service and Sentricon® Always Active® Technology. Home Team backs its installation and service with a \$1 Million Termite Warranty that covers the cost of repairs and retreatment if termites damage your home.
